SUMMARY

Data visualization journalist focusing on politics with a background in economics and data analytics. Translates complex political and economic data into structured visual news coverage, including live vote breakdowns, long-running trackers and swift reactions to breaking news. Combines reporting, quantitative analysis and development to make institutional power measurable and clear.

SKILLS

Data analysis and visualization
JavaScript, D3.js, React, HTML, CSS, Python, R, Excel

Mapping and GIS
QGIS, Mapshaper, Google Earth Pro, Pictometry, cartographic design

Design and production
ai2html, Adobe Illustrator, Photoshop, InDesign, After Effects, Figma, Blender

Tools and platforms
Datawrapper, GitHub, APIs, RAWGraphs, Photo Mechanic, newsroom CMS tools

EDUCATION

Bachelor of Arts, Economics
University of Maryland, College Park
2013 – 2017

CERTIFICATIONS

Data Analytics and Visualization
George Washington University

Data Analytics
Google

PROFESSIONAL MEMBERSHIPS

North American Cartographic Information Society

Society for News Design

National Press Club

PROFESSIONAL EXPERIENCE

Graphics Reporter 2022 – 2026
The Washington Post, Washington D.C.

- Reported and built more than 30 congressional vote trackers and visual investigations covering Congress, elections, redistricting, federal spending and the courts, including live vote tracking from the House chamber during consequential legislative debates.
- Built and maintained databases and trackers covering Supreme Court decisions, judicial confirmations and House and Senate votes, analyzing margins, partisan defections and shifts in power.
- Developed reusable newsroom frameworks and automation pipelines using JavaScript, D3, React, HTML, CSS, ai2html and Google Apps Script to power and automate graphics across desks.
- Translated complex legislative text, roll-call records and electoral data into clear static and interactive visual systems, delivering publish-ready graphics under tight breaking-news deadlines.
- Ensured methodological clarity and editorial rigor by writing labels, captions and sourcing notes in AP style and applying AI-assisted research and code tools with direct oversight and verification.

News Aide 2017 – 2022
The Washington Post, Washington D.C.

- Supported daily newsroom operations during the pandemic and periods of civil unrest, managing distribution, supplies and equipment logistics to keep reporting teams staffed and field-ready.
- Coordinated newsroom asset management across laptops, mobile hotspots, phones and protective gear, tracking inventory and preparing field equipment for reporters covering breaking news.
- Managed photo workflows on the Photo desk, organizing image collections, writing captions and credits, updating metadata and vetting wire and stock imagery for copyright and usage compliance.
- Designed next-day print pages across A section, Metro, Sports and Style, making layout and visual hierarchy decisions to meet nightly production deadlines.

Editorial Intern 2017
The Kiplinger Letter, Washington D.C.

- Copy-edited over 20 editions of a weekly forecasting newsletter for clarity, concision and adherence to AP style, sharpening language around fiscal and monetary policy projections.
- Fact-checked reporting on federal tax policy, labor markets, GDP, inflation and interest rates, verifying figures against government sources, Congressional records and agency reports.
- Analyzed BLS, BEA and Federal Reserve datasets in Excel with editors and reporters to validate trends and support coverage of federal tax legislation, regulatory shifts and broader economic forecasts.
